ABOUT KODO

Kodo was founded in 2008 by a new dad in search of true play materials for his son. Frustrated with what he found, he emboldened his background in design and engineering, submersed himself in early education philosophy, and began to build.

Today Kodo is the innovative leader in materials for ECE and we are empowering educators to expect more from their classroom materials. As we move into 2020 with a refreshed brand and a vision of impact, we are excited to present a new catalog with a glimpse of our products. We invite you to visit our website for a more expansive and immersive experience. Thank you for your support and the impact you have on early learning!

SCIENCE + TECHNOLOGY
Light Laboratory

Science, math, and art in one amazing 21st century learning product! Children add and subtract colored light to mix their own hues, draw, build, arrange, count, pattern, and much more. Kodo’s comprehensive Light Laboratory paired with your science curriculum equals remarkable outcomes!

Magnet Walls

Make physical science concepts relevant, fun, and dynamic with Indoor, Outdoor, and Mobile Magnet Wall systems. Children arrange the magnetic parts to explore force, motion, speed, and incline on a vertical surface. Kodo’s Magnet Walls are irresistible to young scientists and engineers!

Wind Tunnel

This clear pivoting wind tube brings a force of nature indoors for scientific play, exploration, and enthusiastic research. Children make predictions, test their theories, and collect data as objects float and fly. This Kodo Original ensures that your STEM program keeps children coming back for more!

In-Person Professional Development

Trainers travel to your location to provide an interactive training which informs and transforms an educator’s practice. See our website for course offerings.

Online Professional Development

To supplement our team of on-site certified trainers, Kodo offers virtual professional development courses that include Professional Learning Communities (PLC).

PD and Product Bundles

Customized packages provide hands-on training for educators with a bundle of materials to support immediate implementation.

“Jasmine Boster, Program Director, University of Michigan Towsley Children’s House

Online Blended Coaching

Specifically designed for a team of teachers to provide online training and live virtual coaching sessions to support hands-on learning and application.

“I am happy to share that our experience with Kodo has been excellent. We learned a great deal from the professional development training that we experienced. Specifically, the training helped us learn better strategies to edit our environment in a way that best encourages children’s engagement. We also love the materials! Children never grow tired of playing with the variety of Kodo loose parts!”

Early Engineering

Toddlers love to test their ideas over and over again. Engineering skills begin with exploration and grow with repetition. Support emerging engineering play behaviors, logic and reasoning, and communication skills with ramps, balls, and building blocks all designed for toddlers.

Tactile Materials

Natural wool, cloth, cork, and metal all contribute to a rich collection of textures and weights. Our Sandbags, Korxx Blocks, and Wool Balls activate the senses, spark inquiry, and foster vocabulary development. STEM concepts such as shape, size, color, and number begin with a classroom full of varied materials.

Toddler Tools

Tools help get a job done. For toddlers this is no exception. Our line of toddler tools empower youngsters to experiment and understand the intent, purpose, and satisfaction of using a tool to accomplish a goal. Trial and error, prediction, and cause and effect relationships are all practiced using tools.
